Shopify ka kaam: FAQ, Case size, Warranty

Tussles Store · 20 October 2026 · WhatsApp bot ke liye

Yeh kyun zaroori hai? WhatsApp bot sirf wohi baat customer ko batata hai jo Shopify mein likhi ho. Agar koi baat store mein likhi nahi, to bot "confirm nahi kar sakta" kehta hai. Neeche teen kaam hain jin se bot client ke faislon ke mutabiq sahi jawab dega. Har kaam ke baad **Save** zaroor karein.

#	Kaam	Kis liye
1	FAQ page banana	Smart watch, qisten, straps, Submariner ka farq, delivery
2	Case size option lagana	Jin watches ke alag size hain, bot size bata sake
3	Warranty confirm karke FAQ mein daalna	Client "6 mahine" pakka kare, phir line add

Kaam 1: FAQ page banana

Client ke faislay (20 October): smart watches **milti hain**, qisten **nahi**, straps sirf **kuch models** ke, 16610 aur RLX Submariner Rubber mein **sirf strap ka farq**, delivery **sirf Lahore**.

Steps

1. Shopify Admin kholo: **Online Store** → **Pages**.
2. **Add page** dabao.
3. **Title** mein likho: **FAQ**
4. **Content** mein neeche wala text bilkul waisa hi paste karo (har sawal alag line par).
5. Neeche **Visibility** ko **Visible** rakho.
6. **Save** dabao.

```
Do you sell smart watches?
Yes, we sell smart watches.

Can I buy in instalments?
No, we do not offer instalments.

Do you sell straps separately?
Straps are sold separately for some models only. Ask us about the model you have.

What is the difference between Rolex Submariner 16610 and the RLX Submariner Rubber models?
They are the same Submariner watch. The only difference is the strap: the 16610 has a
metal strap and the RLX Submariner Rubber models have a rubber strap.

Where do you deliver?
We deliver within Lahore only, in 2 working days after the order is confirmed.
```

Dhyan rahe: text English mein hi rehne dein. Bot Roman Urdu mein poochne wale customer ko bhi isi se jawab deta hai. Agar store mein payment ka tareeqa (jaise sirf cash on delivery) bhi batana ho to ek line aur add kar sakte hain.

Kaam 2: Case size option lagana

Client ne bataya ke **kuch watches** alag size (jaise 40 mm, 44 mm) mein milti hain. Bot size ka jawab tabhi de sakta hai jab product mein **"Case size"** naam ka option ho. Har us watch ke liye jo ek se zyada size mein milti hai:

Steps

1. **Products** mein woh watch kholo.
2. Neeche **Variants** section mein **"Add options like size or color"** dabao.
3. **Option name** mein bilkul yeh likho: **Case size** (yahi spelling, bot isi naam ko pehchanta hai).
4. **Option values** mein har size alag likho, number ke saath **mm**: jaise **40mm**, **44mm**.
5. **Done** dabao. Har size ka alag variant ban jayega.
6. Har variant ki **price** aur **stock** sahi bharo (size ke hisaab se price alag ho sakti hai).
7. **Save** dabao.

> **Agar watch mein pehle se "Color" option hai:** koi masla nahi, "Case size" doosra option ban jayega. **Sirf ek size** wali watches mein kuch karne ki zaroorat nahi.

Kaam 3: Warranty confirm karke FAQ mein daalna

Client ne bataya warranty **sirf machine (movement)** par hai. Muddat ke liye **6 mahine** ka mashwara diya gaya hai, lekin yeh customer se waada hai, is liye **pehle client se pakka karein**.

Steps

1. Client se poochein: *"Machine ki warranty kitne mahine ki hai? 6 mahine theek hai?"*
2. Jawab milne ke baad **Online Store** → **Pages** → **FAQ** kholo.
3. Neeche yeh 2 lines add karo (agar client ne 6 ki jagah koi aur number bataya to woh likho).
4. **Save** dabao.

```
Do the watches have a warranty?
Yes, the movement (machine) has a 6-month warranty. The warranty covers the movement
only, not the strap, glass or case.
```

> **Client ke confirm karne se pehle yeh line mat daalna.** Bot jo likha hoga wahi customer ko waada karega.

Kaam khatam hone ke baad

Developer ko bata dein ke teeno kaam ho gaye. Woh bot ko nayi maloomat parhwa dega aur test karega.

Developer ke liye (Shopify wale ko yeh nahi karna):

```
uv run python -m app.jobs.reconcile --mode policy
uv run python -m app.jobs.reconcile --mode delta
uv run python -m app.cli rag-search "do you sell smart watches"
uv run python -m app.cli rag-search "qiston pe mil sakti hai?"
```
